A1	BMCC	Apparatus to test air quality and report conditions	3	BMCC does not have apparatus to test air quality and the City falls outside the Metropolitan Air Quality Study carried out by the State Government Department of Environment and Conservation. BMCC does however investigate local air quality complaints.	<i>BMCC Comprehensive State of Environment Report 2003-2004</i>	1	3	9
A2	BMCC	Rules for the quality of water supplies and pollution free water in rivers and waterways	2	<p>Sydney Water supplies more than 1.4 billion litres of water to more than 1.6 million homes and businesses each day. The untreated water is bought from the Sydney Catchment Authority (SCA), the organisation responsible for bulk water supply in the Greater Sydney region. Water is treated in accordance with the Australian Drinking Water Guidelines at 9 water filtration plants.</p> <p>The quality of water within the catchments and storages is of primary concern to the SCA. One of the SCA's main functions is to protect and enhance water quality enabling them to meet the stringent quality standards required for the water supplied to their customers. The SCA continually conducts water quality monitoring in order to meet these quality standards, and to meet their objective of protecting public health. Each year the SCA publishes an Annual Water Quality Monitoring Report containing water quality data collected from our catchments and storages. Two regulations and an amending</p>		3	3	6
